

BOOTPROTECT

NEW IN OUR PROGRAMME!

The new BootProtect spurs from Sprenger protect the riding boot with rubber coating on the inside of the spur, invisible from the outside.

The spurs also impress with their non-slip fit and their slim appearance. Since the outer surface of the spurs is made of stainless-steel, they are ideal for sensitive horses or during coat change.

The BootProtect spurs are 100% break-proof.

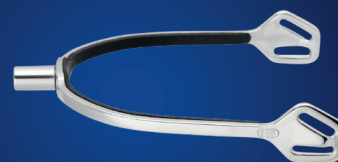

BootProtect spurs

with Balkenhol loop
